

# Making **SENSE** of **DIGITISATION** for **COMPANIES**

## What does digitisation mean?

Digitisation for companies is the process of converting manual operations to digitally-enabled workflows for productivity gains and business transformation

### Common Practice

- Information is not readily available
- Documents are prepared manually
- Product knowledge & SOPs are known to only a few staff
- Work progress is tracked manually

### Digitisation Uncertainties

- How do I start to digitise my company's operations?
- Which work functions should I start to digitise first?
- What type of digital technologies should I adopt for my company?
- Do I need an ERP, CRM, WMS system?

### Our Solution

- Review and map your company's operation workflow
- Identify areas for digitisation and workflow systemisation
- Identify any 3rd party tools to support operations workflow

Spend a few days with us and embark on your digital journey with the right foundation!
