

The Perfect Business Application

built according to your requirements

FITPRISE Enterprise Management System (EMS) is a custom-built web-based software management system designed to fit and integrate business operations workflow in any industry.

FITPRISE EMS offers companies the flexibility and scalability often required by SMEs and even large organisations. The ability to automate business processes, with the flexibility to extend the system to support all other business workflows, at minimal disruption and manageable cost. This is vital in helping companies manage their capital expenditure and phase-in such technology changes to their operations.

FITPRISE

ENTERPRISE MANAGEMENT SYSTEM

- web-based management system
- supports end-to-end operations flow
- scalable & rapid system deployment
- value for money investment

Enhanzcom Pte Ltd

Enhanzcom Pte Ltd was established in 2007 with a vision to bring new software technologies at affordable investment value to SMEs (Small Medium Enterprises). Through the support of A*STAR SIMTech, we engineered and developed an application development platform - FITPRISE UCA. Our objective is to enable easy creation of customised and scalable management systems for companies to adopt into their operations.

Enhanzcom's solutions are designed to meet three essential requirements that SMEs are looking for when it comes to adopting management systems. They are customised functionality, ease of use and affordable costs. This is especially relevant for SMEs in Singapore. Its struggle is to innovate its processes to be ahead in an already ultra-competitive SME segment.
